Title: FUNCTION/SERVICE BASED AUTOMATIC IMPORT/DISTRIBUTION OF DATA

ELECTION IN RESPONSE TO RESTRICTION

Bellevue, Washington 98004

September 22, 2004

TO THE DIRECTOR OF THE PATENT AND TRADEMARK OFFICE:

The following is response to the Office Action dated April 27, 2004, in which the Examiner issued a Restriction in the above-identified application. Specifically, the Examiner indicated that the application is restricted to one of three groups of claims. Group I includes Claims 1 – 23 and 44 – 68, wherein the Examiner indicates that independent Claim 1 is claiming “a method of operation for determining the first application provides (*sic*) a function/service to first data stored in the first data set and generating the first data set for the said application,” while independent Claim 44 “is claiming “the same with a storage media and apparatus instead of a method.” The Examiner notes that “all these claims are drawn to manipulating data structure, classified in class 707, subclass 101. In Group II, the Examiner has included Claims 24 – 32 and 69 – 79, wherein the Examiner states that independent Claim 24 is claims “a method for generating a plurality of ranks for first and second operation,” and that independent Claims 69 is claims “the same concept with a storage media and apparatus instead of a method.” It is the Examiner’s belief that “all these claims are drawn to Generating Database or data structure, classified in class 707, subclass 102.” Finally, Group III includes Claims 33 – 40, 41 – 43, 80 – 89, and 90 – 94, wherein the Examiner indicates that independent Claims 33 and 41 are claiming “a method of retrieving plurality of data subscription statements, presence criteria and importing data,” while independent Claims 80 and 90 “are claiming the same concept with a storage media and apparatus instead of a method.” It is further noted by the Examiner that “all these claims are drawn to query processing, classified in class 707, subclass 3.”

DETT0003-1-2350003Election 9-22-04.doc

1 The Examiner justifies his restriction by asserting that the inventions in Groups I - III "are
2 related as subcombinations disclosed as usable together in a single combination," and further notes
3 that each of the three respective inventions "have a separate utility as in a system not having the
4 others." The Examiner concludes that because the inventions have each "acquired a separate status in
5 the art as shown by their different classification, restriction for examination purposes as indicated is
6 proper."

7 In response to this Restriction, applicants hereby elect Claims 1-23 and 44-68 in Group I,
8 without traverse. Since this response making an election is being filed during the fourth month
9 extension of the period to respond, the appropriate extension fee is included herewith.

10 Respectfully submitted,
